Summary

Customer Success Engineer with 3+ years of experience building production applications, backend services, APIs, and automation solutions. Experienced in working with clients to understand requirements, build practical solutions, and take them from development to deployment. Skilled in Node.js, JavaScript, REST APIs, databases, AWS, and AI automation.

Technical Skills

- **AI & Automation:** AI Agent Development, Workflow Automation, Vapi, Lovable, Retool, DronaHQ, Prompt Engineering, Conversational AI, LLM Integrations, Cursor, Claude Code
- **Backend & APIs:** Node.js, Express.js, JavaScript, Python (Basic), REST APIs, OAuth2, JWT, Webhooks
- **Databases & Cloud:** MongoDB, PostgreSQL, MySQL, Redis, AWS EC2, AWS S3, Docker (Basic)
- **Tools & Practices:** Git, GitHub, Postman, Unit Testing, Debugging, Error Handling

Experience

DronaHQ | Customer Success Engineer | Mumbai | June 2023 – Present

- Built and delivered production applications for enterprise clients based on business requirements.
- Developed Algihaz solutions using Node.js, Gmail APIs, PostgreSQL, and dynamic PDF generation, supporting workflow automation and escalations.
- Optimized the Orix IOM reimbursement solution using lazy loading and resilient design patterns, reducing processing delays by 30%.
- Designed and deployed an autonomous AI voice agent using Vapi, ElevenLabs, and Salesforce to automate lead qualification, extract structured insights, and update CRM records.
- Built an automated workflow application for Cognota integrating HubSpot CRM and Slack APIs through REST APIs and webhooks for real-time alerts, pipeline tracking, and ROI calculations.
- Developed 70+ enterprise tools and POCs, handling implementation, debugging, testing, and customer-facing technical support.

FunctionUp | Backend Developer Trainee – Delhi | Sept 2022– May 2023

- Designed REST APIs and web backends using Node.js, Express, and MongoDB; implemented JWT/OAuth2 authentication and structured error-handling mechanisms

Projects

AWS S3 File Explorer | JavaScript, AWS S3, Athena

- Built a file management application for uploading, downloading, and browsing S3 objects, with AWS Athena integration for querying JSON-based data

AI Custom Control Agent | DronaHQ, AI Automation

- Built a hackathon solution focused on using an AI agent to simplify the creation of custom DronaHQ controls

Education

Master of Business Administration (IT) | Swami Vivekanand Subharti University | 2022–2024

Bachelor of Computer Applications (BCA) | I.P. College Campus-2 | 2019–2022

Awards & Certifications

- **Top Performer Award:** recognized for consistent high-quality work and customer-focused technical delivery.
- **Hackathon:** Build an AI agent that simplifies the creation of custom DronaHQ controls.
