Summary

Experienced in automation, AI integrations, Node.js, JavaScript, APIs, and AWS. Proven track record of building scalable automation workflows, agentic systems, and 70+ enterprise tools and POCs. Skilled in designing business-focused solutions, integrating third-party systems, and delivering measurable client impact. Recognized with multiple Top Performer awards for technical excellence and customer success.

Technical Skills

- AI & Automation:** AI Agent Development, Workflow Automation, n8n, Vapi, ElevenLabs, Lovable, Retool, DronaHQ, Prompt Engineering, Conversational AI, LLM Integrations, Cursor, Claude Code
- Backend & Frontend:** Node.js, Express.js, JavaScript, REST APIs, OAuth2, JWT, React.js, HTML, CSS
- Database & DevOps:** MongoDB, PostgreSQL, MySQL, Redis, AWS (EC2, S3), Docker (basic)
- Tools & Practices:** Git, GitHub, Notion, Postman, Unit Testing, Debugging, Error Handling

Experience

DronaHQ | Solutions Engineer – Mumbai | June 2023 – Present

- Developed applications for Alghiaz, integrating Gmail APIs to automate workflow execution and real-time escalations. Built services for dynamic PDF generation and maintained self-hosted infrastructure.
- Optimized the Orix IOM reimbursement solution by implementing lazy loading and resilient design patterns, successfully reducing processing delays by 30%.
- Designed and deployed a production-grade autonomous AI voice agent using Vapi, ElevenLabs, and Salesforce to automate lead qualification, extract insights, and update **CRM** records instantly.
- Engineered an automated workflow application for **Cognota**, seamlessly integrating HubSpot CRM and Slack APIs to execute real-time team alerts, pipeline tracking, and an automated **ROI calculation** engine via REST APIs and webhooks.
- Developed 70+ tools and POCs for enterprise clients like **Clevertap**, executing all unit testing, debugging, and troubleshooting for robust error handling.

FunctionUp | Backend Developer Trainee – Delhi | Sept 2022– May 2023

- Designed scalable REST APIs and web backends using Node.js, Express, and MongoDB; implemented secure JWT/OAuth2 authentication and structured robust error-handling mechanisms.

Projects

AWS S3 File Explorer (Feb 2025) | JavaScript, AWS S3, Athena

- Engineered a file manager to view, upload, and download S3 files; integrated AWS Athena for high-speed querying and parsing of raw JSON-based integrations, optimizing data retrieval speeds.

LinkSlice (Feb 2023) | React.js, JavaScript, Node.js, MongoDB, Redis

[GitHub Link](#)

- Developed a URL shortener to convert long links into concise, user-friendly URLs
- Enabled seamless redirection to original destinations on link access

Education

Master of Business Administration (IT) Subharti University	(2022–2024)
Bachelor of Computer Applications (B.C.A) I.P College Campus-2	(2019–2022)

Awards & Certifications

Top Performer Award: Won Top Performer award for consistent high-quality work.	view
Hackathon: Build an AI agent that simplifies the creation of custom DronaHQ controls.	view
